

How to Use Playaways in Your Car

You will need:

- Playaway audiobook

- Car stereo equipped with an auxiliary audio input jack (Sometimes also called aux or line-in jack)

- 3.5mm auxiliary cable (Sometimes also called a mini-stereo or headphone cable) with male-to-male ends. These are available at electronics or department stores.

Step 1: Connect one end of the auxiliary cable to the headphone jack on the Playaway.

Step 2: Connect the other end of the auxiliary cable to the auxiliary audio jack in your car stereo.

Step 3: Start the Playaway and adjust the volume on the Playaway and/or your stereo to your preference.

Note: You may need to switch your stereo's output to the auxiliary setting for the Playaway to work.
